

Vietnam AI Impact Festival 2026

Evaluation Rubrics

Evaluation Rubrics – AI Changemakers

Metric 01: Enriching Lives - Impact & Inclusion | 15 Points

Parameters	Description	Point distribution metrics	Points Range
Significance of the problem statement	Is the problem clearly defined - what it is, where does it exist, its relevance, and proposed solution?	0 points – no ; 1 point – somewhat ; 2 points – yes	0-2 Points
	Is the evidence of problem's existence given through citations or references?	0 points – no ; 1 point – yes	0-1 Point
Diversity & Inclusion	Is the Target Audience well defined - who they are, how are they affected?	0 points – no ; 1 point – somewhat ; 2 points – yes	0-2 Points
	Does the solution provide equivalent UX for all?	0 points – no ; 1 point – yes	0-1 Point
	Does it remove tech barriers for people with disabilities?	0 points – no ; 1 point – yes	0-1 Point
	Is it a financially viable option for the target audience?	0 points – no ; 1 point – yes	0-1 Point
	Does it work offline/low-bandwidth?	0 points – no ; 1 point – yes	0-1 Point
	Does it support multilingual/multi-modal interaction?	0 points – no ; 1 point – yes	0-1 Point
Impact of the solution on society & human lives	Is the impact on society clearly defined?	0 points – no ; 1 point – yes	0-1 Point
	Does the AI component create impact not achievable through traditional software alone?	0 points – no ; 1 point – yes	0-1 Point
	Is the innovation properly mapped to SDGs?	0 points – no ; 1 point – yes	0-1 Point
	Are the environmental implications of the AI innovation considered?	0 points – no ; 1 point – yes	0-1 Point
	Emphasis on innovation sustenance through sustainable pathways	0 points – no ; 1 point – yes	0-1 Point

Evaluation Rubrics – AI Changemakers

Metric 02: AI Innovation: Application & Implementation | 20 Points

Parameters	Description	Point distribution metrics	Points Range
Requirement & Innovative Use of AI in the Solution	Can the solution work without AI as well? Is it a force-fit?	0 points – no ; 1 point – yes	0-1 Point
	Is AI the primary technology used or is it an accessory / additional tool?	0 points – no AI ; 1 point – additional ; 2 points – main element	0-2 Points
	Based on your experience, how would you classify the idea?	0 points – no AI ; 1 point – generic idea ; 2 points – adaptation of an existing idea ; 3 points – new/original	0-3 Points
	Did participants demonstrate their AI knowledge and skills used for the solution development?	0 points – no ; 1 point – somewhat ; 2 points – yes	0-2 Points
	Is it clearly demonstrated how data is obtained and analyzed?	0 points – no ; 1 point – yes	0-1 Point
	Is the data selection, analysis, and usage properly explained or justified?	0 points – no ; 1 point – yes	0-1 Point
Level of Complexity & Responsible Use of AI	Have the ethical concerns been addressed in the submission?	0 points – no ; 1 point – yes	0-1 Point
	Have any points been made towards data protection and privacy?	0 points – no ; 1 point – yes	0-1 Point
	Have any steps been taken or spoken about towards mitigating / reducing biases from the solution?	0 points – no ; 1 point – yes	0-1 Point
	Does the AI solution take its environmental impact into consideration?	0 points – no ; 1 point – yes	0-1 Point
Readiness of the Solution	Demonstrated a working prototype of the solution.	0 points – no ; 1 point – yes	0-1 Point
	Status of solution deployment	0 points - no tests done ; 1 point – tested under controlled environment ; 2 points – deployed on a public / open-sourced link	0-2 Points
	Have they shared a GTM/deployment strategy?	0 points – no ; 1 point –spoken about ; 2 points – demonstrated	0-1 Point

Evaluation Rubrics – AI Changemakers

Metric 03: Technical Knowledge and Skills | 15 Points

Parameters	Description	Point distribution metrics	Points Range
Technical Specifications of the AI solution	Is the tech-stack explained?	0 points - no mention ; 1 point - just mentioned, not elaborated ; 2 points - well defined	0-2 Points
	What kind of hardware is used in the solution?	0 points - no mention of hardware ; 1 point - general purpose computing system (desktop/laptop) ; 2 points - AI-optimised hardware used (AI PCs or equivalent) ; 3 points - select components used; very specific to solution	0-3 Points
	What kind of software is used in the solution?	0 points - no mention of software ; 1 point - no-code/low-code solution ; 2 points - single software/ program used ; 3 points - multiple software, code fragments, API integration, etc.	0-3 Points
	Complexity of User Interface	0 points - no interface (code only) ; 1 point - no-code/low-code, drag & drop, or equivalent used ; 2 points - pre-defined code templates used ; 3 points - made specifically for the solution	0-3 Points
	Usage of emerged AI	0 points - no code AI ; 1 point - traditional programming used ; 2 points - advance packages, tools, or equivalent used ; 4 points - inclusion of latest advancements like Gen AI, Agents, RAG, multimodal AI, or equivalent	0-3 Points
